👤 PROFILE

Experienced in building for mobile and web using Java, Python, Flutter, Kotlin, Swift, NodeJS and Web frameworks (ReactJS, GatsbyJS, VueJs).

I have a good knowledge of software development lifecycles. Able to effectively self-manage during independent projects, as well as collaborate as part of a team.

The LINKS section has clickable links to my portfolio. Or see my-portfolio-website.

PROJECT

My portfolio website: tobi-omorubore.dev

Which shows relevant skills, projects I have work on. I built this using:

- ReactJS, GatsbyJS, Style-component CSS, Remark, Netlify, NameCheap, BFF pattern.

EMPLOYMENT HISTORY

Software Engineer (March 2024 - Present)

With DataFidelity building POSTCODE-NG: A solution that makes it easy to look up Nigeria postcodes by states, city, town, street. I work on the:

- Database that holds the relationship between entities and their postal codes.
- Backend API which serves as the doorway to access or query the database.
- Queries to Insert, retrieve & delete from tables.
- Postcode lookup website (which talk to backend API) for end user.
- Admin site serve as the interface that will be use to create, update, remove data.
- TOOLS: MySQL, Spring-boot, PHP, VueJS, SwaggerUI, GeoJson API, Bootstrap, SASS.

Software Engineer (2022 – March 2024)

With Collaction (A start-up in the Netherlands) on part-time. I help with:

- Mobile app using Flutter. URL is: Collaction.org
- Tools/Skills: Bloc, Domain-Driven Design (DDD), Next-JS, ReactJs

Software Engineer (Jun2023 – Nov2023)

With ZinoxTech on Full-time. Site URL. I help build:

- An Image Transformer: URL, real-time image manipulation. Similar to imagekit.io This has been hosted and being used internally as micro service by several of other projects to display provide image base on a client screen form factor.

- Logistics Aggregator: between multiple couriers to transport items. With consideration for partners with intercepting polygons.

- Headless Image Micro-Service: Rest and GraghQL endpoints, that a client can integrate to fetch image from multiple sources.
- Tools/Skills: Python, FastApi, AWS S3, MongoDB, MySQL, Postman-doc.

Data Scientist (3 months. Feb – May 2023)

For a client (Given a dry bean dataset, develop a system for automatic detection of 7 types of dry bean seeds.

- K-Nearest Neighbour (KNN) and Support Vector Machine (SVM) was used for the analysis. With performance measured. View solution

Contract Mobile App Work (2020 -2022)

With <u>MostHighGrade</u> a start-up located in the USA:

- An app for showcasing smoking related products. Worked with owner from Idea stage, app requirement, mock-up. Launched app on Apple Test flight.

<u>With BUTTON SIMPLE team</u>: an app for Care givers to talk with their aged parents.
